HA Strategy

Comprehensive Strategy for Growing Horizons Architecture into a Meaningful Company in Collaboration with Tec de Monterrey

Vision

Horizons Architecture (HA) aspires to become a transformative global platform, empowering organizations and individuals to achieve their legacies through a blend of AI-powered systems, human expertise, and an advanced system-thinking framework. HA aims to lead in the field of hybrid intelligence, where human insight, advanced AI, and the HA framework—including an AI & Data System deployed in a multi-user fractal network—collaborate to address complex challenges, fostering innovation and sustainable growth.

Where to Play

Horizons Architecture operates at the intersection of advanced AI technology, strategic consulting, hybrid intelligence, and a structured system thinking framework. The company targets high-growth organizations across diverse industries, focusing on underserved niches that may benefit from HA's combination of AI, consulting expertise and the HA framework. Our dual business model—consulting and tiered SaaS licensing—enables us to serve organizations globally, scaling through a flexible AI-driven platform that integrates human involvement with systematic, data-driven problem-solving supported by the HA framework's AI & Data System and fractal network.

How to make it

1. **Dual Revenue Streams with Tiered and Modular Offerings**
    - **Consulting Services**: We offer high-value consulting services, with an average engagement valued at $65,000 USD. By integrating AI with human judgment and the HA framework's system thinking principles, we position HA as a trusted partner in strategic transformation.
    - **SaaS Licensing**: Provide a flexible, AI-powered SaaS model with tiered pricing options:

    - **Entry-level (GPT-4o-mini)**: $7 USD per user, aimed at broad market accessibility.
    - **Mid-tier Options**: Introduce 2-3 intermediate tiers featuring incremental capabilities tailored to specific industry needs.
    - **Premium Tier (GPT-4o)**: $120 USD per user, delivering advanced functionalities for enterprises requiring sophisticated AI solutions and full integration with the HA system thinking framework.
  - **Modular Features**: Enable clients to customize their SaaS experience by adding specific features that address their unique challenges, leveraging the HA framework's AI & Data System and fractal network to optimize performance and scalability.
2. **Progressive International Expansion**
  - **Leverage Initial Success**: Capitalize on existing achievements in the USA, Costa Rica, and Switzerland to explore and establish new markets globally.
  - **Strategic Market Entry**: Focus on expanding into regions such as Saudi Arabia, applying cultural and economic insights to refine our market entry strategy.
  - **Diversification**: Broaden our reach across various industries and geographies, thereby reducing reliance on any single market and showcasing the versatility of HA's hybrid intelligence approach and system thinking framework.
3. **Strategic Partnerships and Collaboration with Tec de Monterrey**
  - **Tec de Monterrey**:
    - **Hybrid Human-Machine Intelligence Lab**: Establish this lab within Tec de Monterrey to drive continuous research, development, and innovation, positioning HA as a leader in hybrid intelligence and system thinking applications.
    - **Academic and Research Collaboration**: Leverage Tec's intellectual property, research capabilities, and reputation to co-develop cutting-edge solutions and expand HA's academic influence, particularly in the application of the HA framework.

- **Global Academic and Tech Partnerships**:
  - Collaborate with leading academic institutions and technology companies to expand our knowledge base, remain at the forefront of AI advancements, and explore novel applications of hybrid intelligence and the HA system thinking framework.
- **Market Access Partnerships**: Build alliances with organizations that can facilitate market entry or introduce HA to significant user bases.

4. **Sustainable Financial Strategy with Risk Management**
   - **Bootstrapping and Selective Investment**: We will prioritize sustainable growth through bootstrapping while preparing for strategic investment rounds by 2025 that contribute both capital and strategic value.
   - **Risk Management and Scenario Planning**: This year, we are forming a risk management committee to proactively evaluate potential challenges, conduct scenario planning exercises, and maintain a cash reserve to manage unforeseen events.
   - **Revenue Goals**: Aim for $1.5M USD in the first year starting in May 2024, with rapid scaling as our SaaS model gains international traction, driven by both consulting and licensing revenues.
5. **Innovation and Technology Development**
   - **Continuous Enhancement of HA's AI & Data System**: We will integrate the latest advancements to maintain the cutting-edge nature of our AI technology, with a strong focus on explainable AI to ensure transparency and trust. This is where Tec de Monterrey can play a crucial role.
   - **Human-Machine Centric R&D**: We want to establish a dedicated R&D team within the Hybrid Lab to explore new applications of hybrid intelligence. Ensure that our technology and the HA system thinking framework complement and enhance human capabilities.
   - **Agile Development**: Implement an agile development process to quickly adapt to emerging technologies, market demands, and customer feedback, ensuring that our offerings remain relevant and valuable.
6. **Talent Acquisition and Human-Centric Culture**

- **Global Talent Partnerships**: Form partnerships with top universities worldwide to create AI-focused internship and graduate programs, nurturing the next generation of hybrid intelligence and system thinking framework experts.
- **Competitive Compensation and Equity Options**: Attract and retain top talent by offering competitive packages that include equity, aligning employee success with company growth.
- **Culture of Innovation and Inclusion**: Develop a strong employer brand that emphasizes innovation, impact, and growth opportunities, supported by a robust remote work policy to attract global talent.

7. **Market Positioning and Customer Acquisition**

- **Excellence-Driven Growth**: Focus on delivering outstanding results through consulting and SaaS offerings to build a strong reputation in the market. Our primary marketing strategy will rely on word-of-mouth referrals, driven by client satisfaction and demonstrated success.
- **Referral and Networking**: Utilize existing client networks through referral programs and strategic networking to accelerate growth and customer acquisition.
- **Unique Value Proposition**: Clearly communicate HA's hybrid intelligence model—where AI, human expertise, and the HA system thinking framework converge to deliver better outcomes—and the tangible benefits it offers.
- **Industry-Specific Solutions**: Create case studies and ROI calculators that demonstrate the value HA brings to different industries, supported by data-driven insights from the HA framework's AI & Data System.
- **Multi-Channel Marketing**: Implement a comprehensive marketing strategy, integrating content marketing, thought leadership, and targeted digital advertising to engage key decision-makers.
- **Client Advocacy**: Encourage satisfied clients to share their positive experiences within their networks, leveraging organic growth through referrals.

- **Foundational Marketing Setup**: While the first year will emphasize excellence in service delivery, the initial groundwork will be laid for future marketing efforts, such as establishing a basic online presence and developing content that can be used in subsequent years for more structured marketing initiatives.

8. **Operational and Human-AI discipline**
    - **Lean and Scalable Operations**: We will maintain a lean operational model to optimize our $250k/year cash burn rate while building scalable processes that can grow with the company.
    - **Automated and Human-AI Integrated Systems**: We are in the process of establishing automated onboarding and support systems that integrate AI with human oversight to ensure high levels of customer satisfaction, enhanced by the HA system thinking framework.
    - **Customer Success as a Service**: Establish a dedicated customer success team to bridge high-touch consulting with self-service SaaS offerings, ensuring clients achieve their goals with HA.
9. **Metrics, Performance Tracking, and Adaptation**
    - **Balanced Scorecard Approach**: Employ a balanced scorecard with KPIs covering financial performance, customer satisfaction, operational efficiency, and innovation.
    - **Real-Time Analytics and Feedback Loops**: Utilize data analytics from the HA framework for real-time performance monitoring, enabling swift decision-making and continuous improvement.
    - **Quarterly Strategic Reviews**: Conduct regular strategy reviews to assess progress, respond to new challenges, and refine our approach, ensuring alignment with our goals.

Execution Timeline

1. **Immediate (0-6 months)**:
    - Launch the tiered SaaS pricing model and introduce modular features.

- Initiate expansion into key international markets, prioritizing regions with existing client bases.
- Establish the risk management committee and commence scenario planning exercises.

2. **Short-Term (6-12 months)**:
   - Launch the Hybrid Human-Machine Intelligence Lab at Tec de Monterrey and begin R&D projects.
   - Implement the enhanced talent acquisition strategy, including university partnerships and developing HA's employer brand.
   - Start seeking additional strategic partnerships beyond Tec de Monterrey.
3. **Mid-Term (12-24 months)**:
   - Deepen market penetration in targeted international regions, leveraging partnerships to scale quickly.
   - Regularly refine the SaaS offerings based on market feedback and evolving client needs.
   - Prepare for a strategic investment round by the end of the second year.
4. **Long-Term (24-60 months)**:
   - Scale operations to serve a global clientele, balancing consulting and SaaS offerings.
   - Continue innovation within the Hybrid Lab, exploring new opportunities for AI-human collaboration.
   - Achieve a meaningful status within 5 years, driven by strong financial performance, global expansion, and sustained innovation.

Horizons Architecture is committed to meaningful growth and contributing to the evolving landscape of hybrid intelligence. By fostering a collaborative environment where human expertise, advanced technology, and a robust system-thinking framework converge, HA can become a significant player in AI-driven social, economic, and business transformation, addressing the world's most complex challenges.

Niche Down, then Expand:

- **Target a Specific Pain Point:** Instead of pitching HA as a solution for "all complex endeavors," focus on a very specific niche where its strengths shine brightest. For example, climate change mitigation within a particular industry, urban planning in rapidly growing cities, or even streamlining research collaboration in a specific scientific field.
- **Prove Value Quickly:** Develop case studies and demonstrations that showcase how HA solves that pain point faster, better, or more cost-effectively than existing solutions. This tangible evidence is far more persuasive than abstract promises.
- **Scalable Expansion:** Once you dominate your niche, leverage that success to expand into adjacent sectors or broaden your offering within the original domain.

Focus on User Experience and Community:

- **Human-Centric Design:** Despite the tech focus, make HA accessible to non-technical users. Intuitive interfaces, guided workflows, and clear explanations

are crucial. Think "collaboration platform" more than "technical tool."

- **Build a Vibrant Community:** HA's collaborative nature is a major selling point. Cultivate a community around your startup - forums, workshops, hackathons. Encourage user-generated content and knowledge sharing. This network effect boosts adoption and fosters innovation.

Don't Overlook the "Proof of Contribution" Aspect:

- **Incentivize Participation:** Develop clear, transparent systems to track and reward individual and collective contributions within the HA framework. Consider tokenization or reputation systems to gamify engagement.
- **Intellectual Property Rights:** Address ownership and intellectual property concerns early on. This is crucial for attracting collaborators, especially in commercially sensitive projects.

Go Beyond the "Tech" Hype:

- **Emphasize Systemic Change:** HA is more than a software tool; it's a mindset shift towards holistic problem-solving. Frame your marketing and communication around this broader value proposition.
- **Strategic Partnerships:** Forge alliances with institutions, NGOs, or industry leaders working on the complex challenges you're addressing. These partnerships lend credibility and open new avenues for adoption.

Remember: Building a successful startup requires more than just a great idea. It demands a deep understanding of the target audience, a clear value proposition, a strong team, and a relentless focus on execution. By focusing on these aspects, your HA-based startup has a greater chance of thriving in a complex and dynamic world.

---

1. Define Positioning:

Positioning Statement:
Horizons Architecture is the optimal choice for organizations and individuals facing complex, multifaceted challenges that require advanced system thinking, AI-driven insights, and collaborative human-machine interactions. Unlike traditional frameworks, HA provides a multi-dimensional, transdisciplinary

approach that integrates human cognitive strengths with cutting-edge AI and data systems. This unique combination empowers users to effectively manage and transform complex endeavors, ensuring sustainable and scalable outcomes across various domains.

Unique Value Propositions:

- **Comprehensive System Thinking:** HA organizes complex data into six critical dimensions (Legacy, Community, Learning, Technology, Context, and Projects) to provide a holistic understanding of challenges.
- **Advanced AI & Data Integration:** The AI and data systems within HA offer robust tools for processing large datasets, enabling users to uncover insights, detect patterns, and make data-driven decisions.
- **Collaborative Fractal Network:** HA's Multi-user Fractal Network facilitates seamless collaboration among stakeholders, enhancing the collective intelligence necessary for tackling complex issues.

2. Define Ideal Customer Profile (ICP):

Key Characteristics of Best-fit Customers:

- **Sector:** Government, NGOs, educational institutions, large corporations, and research organizations facing complex adaptive challenges.
- **Role:** Decision-makers, strategists, project managers, and researchers who require a comprehensive system thinking framework to navigate complex systems.
- **Pain Points:** Difficulty in managing complex, multi-stakeholder projects; need for advanced data processing and AI insights; challenges in coordinating large teams across disciplines and geographies.
- **Behavior:** Open to adopting innovative technologies, values evidence-based decision-making, and seeks long-term, sustainable solutions.

3. Create an Offer:

Compelling Offer:

- **Access to HA Framework:** A customized HA package that includes access to the System Thinking Framework, AI & Data System, and the Multi-user Fractal

Network.

- **Tailored Onboarding:** Personalized onboarding sessions to integrate HA into your organization's existing workflows, ensuring a smooth transition and immediate value generation.
- **Support & Updates:** Ongoing support and regular updates to the HA system to keep pace with emerging challenges and technologies.

Clear Value Proposition:
"Transform complex challenges into scalable, sustainable solutions with the Horizons Architecture system—a comprehensive framework that combines the best of human intelligence and AI."

4. Decide on Channels:

Primary Channels:

- **Outbound Email Campaigns:** Use highly targeted outbound email campaigns to reach decision-makers in organizations that fit the ICP. Highlight case studies and success stories that resonate with their specific challenges.
- **Webinars & Online Workshops:** Host webinars that demonstrate the power of HA in real-world scenarios, focusing on its application in specific industries such as government policy-making or large-scale project management.

5. Set Revenue Targets and Budget:

Revenue Targets:

- **Short-term Goal:** Achieve a target of onboarding 10 new organizations within the next six months, each contributing to a revenue stream that aligns with your overall annual financial goals.
- **Long-term Goal:** Scale up to 50 organizations within two years, leveraging network effects and cumulative knowledge gained through the Multi-user Fractal Network.

Budget & Distribution:

- **Marketing Budget:** Allocate 40% of your marketing budget to email campaigns, focusing on personalized outreach, and 30% to webinars and

online workshops. The remaining 30% can be reserved for content development (e.g., case studies, white papers) and social media engagement.

- **Resource Allocation:** Ensure adequate resources are allocated for ongoing support and customer success to retain clients and foster long-term relationships.
